THE BRAND

1. Introduction

- 1.1 Brand positioning
- 1.2 Sustainability in communication
- 1.3 Boilerplate

Brand Vision & Mission

WHY

Improve quality of life for the end user by making technology meaningful, human-centered, and impactful.

HOW

By acting as the trailblazer of the tech sector, AGORIA enables Belgian companies and technology enthusiasts to put technology at the service of mankind — with purpose, vision, and societal commitment.

WHAT

A unique blend of:

- **Expertise centers** — deep knowledge and future-facing insight
- **Business development services** — driving growth and competitiveness
- **Lobbying activities** — shaping a tech-driven, inclusive society

Tone of voice

Modern

open, young, open-minded, opportunity-driven, pro-active

Future-Oriented

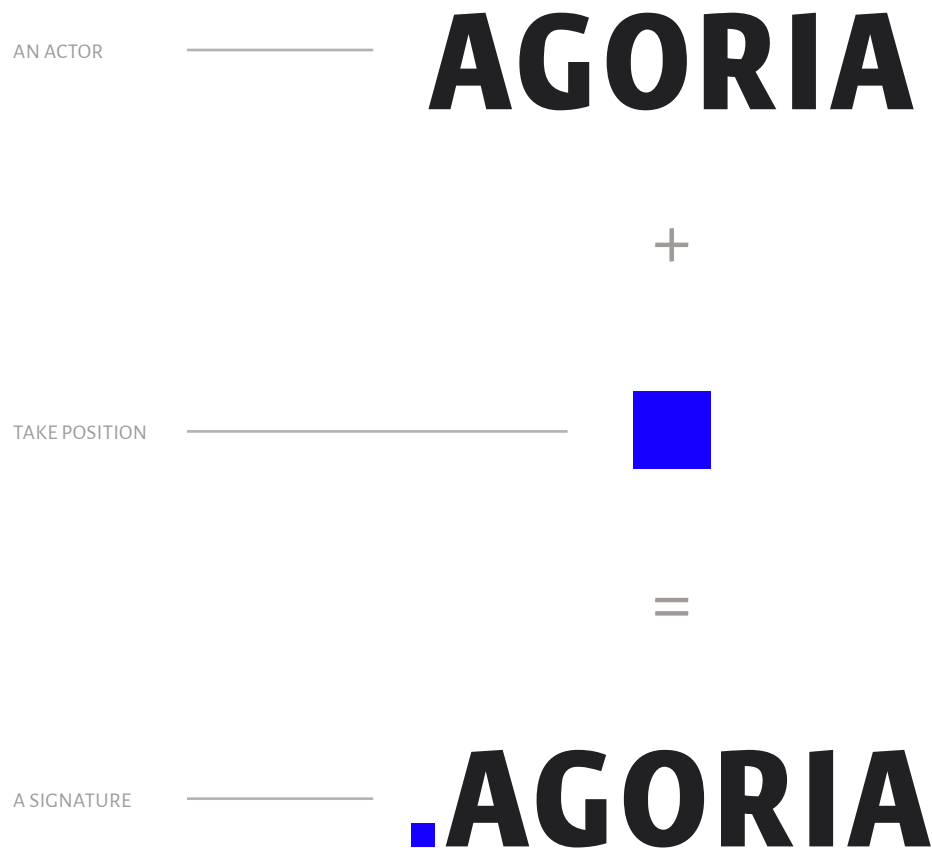

positive, mission-driven, sustainable, tech-for-good

Enthusiastic

engaging, passionate, leading by doing, educator

Formal

serious, conscious, trustworthy

1.1 Brand positioning

AGORIA positions itself as a prominent **actor** in the public and industrial arena, committed to defending the interests of the technology sector and its members. To maximize our influence, we deliberately choose to be highly visible, stepping forward whenever it matters and ensuring our presence is both seen and heard.

We **take position** clearly and confidently on the issues that shape our sector's future — from innovation and competitiveness to sustainability and social impact. This assertive stance allows us to shape the debate, build credibility, and guide decision-makers in both policy and industry.

By actively engaging as a thought leader and strategic actor, AGORIA reinforces its role as a trusted voice and catalyst for progress. Our visibility is not incidental; it is a strategic tool to amplify our impact and safeguard the long-term success of our sector.

AGORIA aims to be a sustainable frontrunner not only as a sector federation but also as an organisation and employer. These efforts focus primarily on the sector, but we also take a closer look at the extent to which AGORIA itself impacts people and the environment. We seek to fully integrate our sustainable efforts into our processes and organisation.

This ambition also shapes the way we communicate. Our goal: maximum message, minimal environmental cost.

That's why we prioritise digital formats. When a physical medium is necessary, we carefully consider the material, supplier, transport and potential for reuse.

*Maximum
message,
minimal
environmental
cost*

1.2 Sustainability in communication

Throughout the AGORIA guidelines, you'll find practical tips to help reinforce our sustainability commitment—step by step, message by message.

A Agoria means progress through technology. We are paving the way for all technology-inspired companies in Belgium pursuing progress internationally through the development or application of innovations and which, together, represent some 324,000 employees. We are proud that more than 2,000 member companies trust in the three pillars of our services: consulting, business development and the creation of an optimal business environment. Follow us on www.agoria.be and <https://X.com/agoriafr>.

B Give your company a boost with Agoria

- **Advice to entrepreneurs**

Leading experts answer your questions on, among other topics, talent and the labour market, innovation, energy, the environment, socio-legal issues, well-being at work, taxation, the economic development of sectors and markets, regulations and standardization.

- **Business development**

Our teams help you promote your offering on the market, identify market opportunities for your products or services, and forge sustainable partnerships in Belgium and abroad. We are currently focusing on the following markets: Automotive Tech Belgium, Building & Infra Tech Belgium, Energy & Chemicals Tech Belgium, Big Science Tech Belgium, Sports & Entertainment Tech Belgium, Food & Beverage Tech Belgium, Medical & Health Tech Belgium, Public & Government Tech Belgium.

- **Creating the ideal business climate**

Working closely with companies, Industry teams identify the strategic challenges facing your industry and help you meet them. In particular, by supporting measures contributing to the establishment of a favourable business climate. Industries include: Manufacturing & Process Systems, IT & Digital Transformation, Materials & Subcontracting, Software Products & SaaS, Mobility & Vehicles, Telecom & Datacenters, Building Tech. & Contracting Services, HealthTech, ASCD Mission Critical Tech. They are backed in their actions by experienced Policy units lobbying to defend your interests at all levels of power. Experienced Policy units also defend your interests, lobbying at all levels of power.

- **Member & employee benefits**

Through its membership, your company and its employees obtain many exclusive discounts and other benefits.

1.3 Boilerplate

The boilerplate is a standardized paragraph that clearly communicates who Agoria is, what we stand for, and the value we deliver. It ensures a consistent representation of our organization across press releases, presentations, partnerships, and other external communications.

The AGORIA boilerplate consists of two parts:

A Core Description:

The first paragraph, which describes in general terms who Agoria is, what it stands for, and the broader purpose it pursues.

B Activities & Support:

The part of the boilerplate that goes into more detail about the services provided, areas of expertise, and the added value offered to members and stakeholders.

Use only the Core Description when space is limited. Include the Activities & Support section when there is sufficient space and when it is relevant to the context.

The text of the boilerplate must **not be modified**.

Important

The consolidated French and Dutch versions of the boilerplate can be requested at branding@agoria.be

THE BRAND

2. Logotype

- 2.1 Logo versions
- 2.2 Safety area
- 2.3 Size and proportion
- 2.4 Logotype variations
- 2.5 Misuses
- 2.6 Baseline

AGORIA

MAIN VERSION

A

A

LOGO MARK

B

ICON VERSION

C

2.1 Logo versions

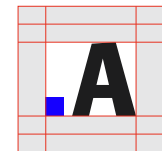

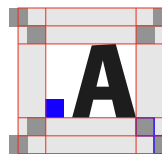

Responsive versions of the logotype offer different possibilities to apply the logotype across all the media that evolves with technology, enabling the logotype to maintain its legibility when resizing your browser, rotate your device, social media avatar's,...

It is recommended to:

- A use the main version across all media
- B use the 'logo mark' in combination with the main version to visually strengthen the connection with AGORIA
 - use the logo mark in contexts where the main version is not necessarily required
 - use the logo mark on social media (avatar)
- C use the 'dot' as a favicon for the website

Important

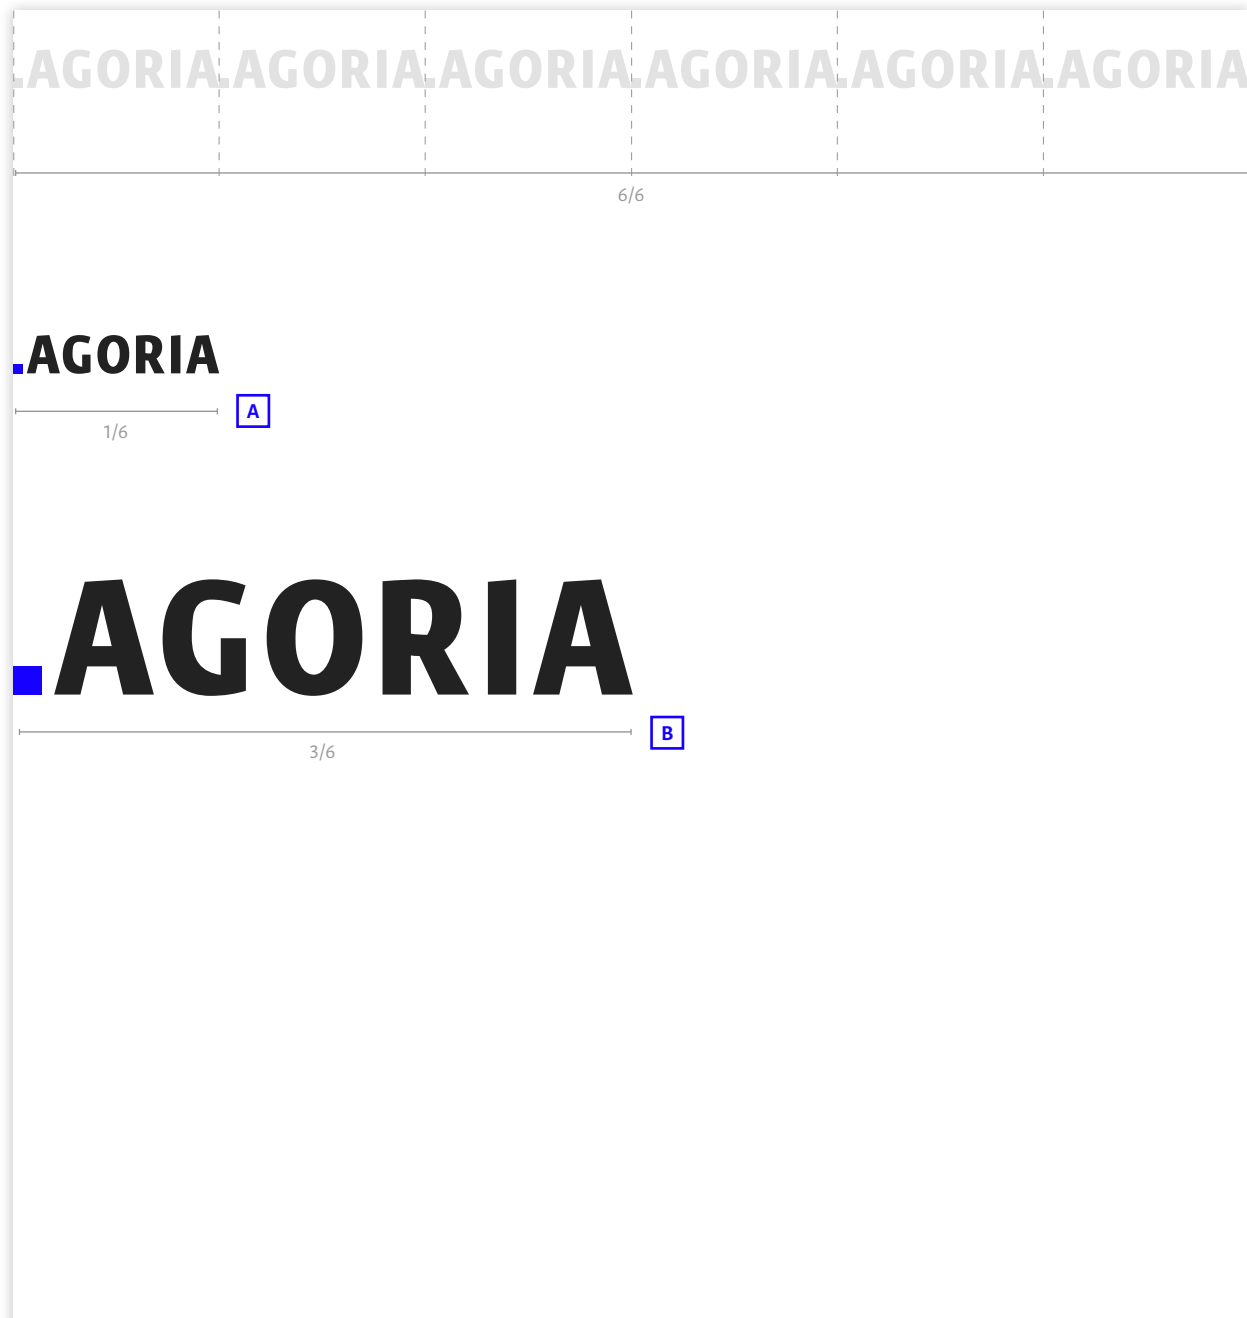

Original artwork can be requested at branding@agoria.be

SAFETY AREA **A**BASE FOR SAFETY AREA **B**GRID **C**

2.2 Safety area

The safety area is an imaginary area around the logotype that has been established to ensure the integrity and good visibility of the logo.

- > This safety area **A** should always remain clear of texts, logos, images or any other visual element that might compromise its legibility
- > The safety area is equal to the size of two times the blue dot **B** of the logotype as represented on the illustration. For the logo mark, the safety area is slightly narrower because the mark needs to fit within a perfect square.
- > The grid **C** of the logotype is created based on the main element of the logotype, the blue dot

2.3 Size and proportion

For all formats, the proportions of the logo are defined by the width of the logo (without the safety area).

The logotype may be used in different sizes between 1/6 and 3/6 of the total width of the layout.

The logotype can be adapted on all sizes between 1/6 and 3/6.

A 1/6 is the minimum size

B 3/6 is the maximum size

Important

Always reduce the logo proportionally

.AGORIA _____ 60 mm

.AGORIA _____ 50 mm

.AGORIA _____ 40 mm

.AGORIA _____ 30 mm

.AGORIA _____ 20 mm

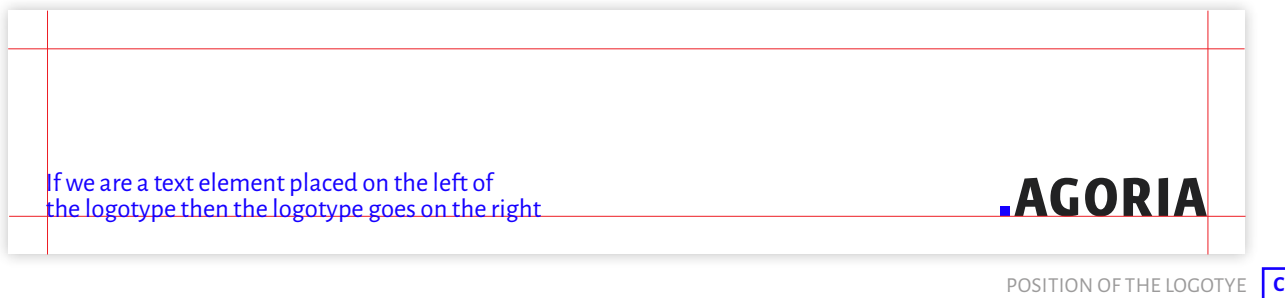

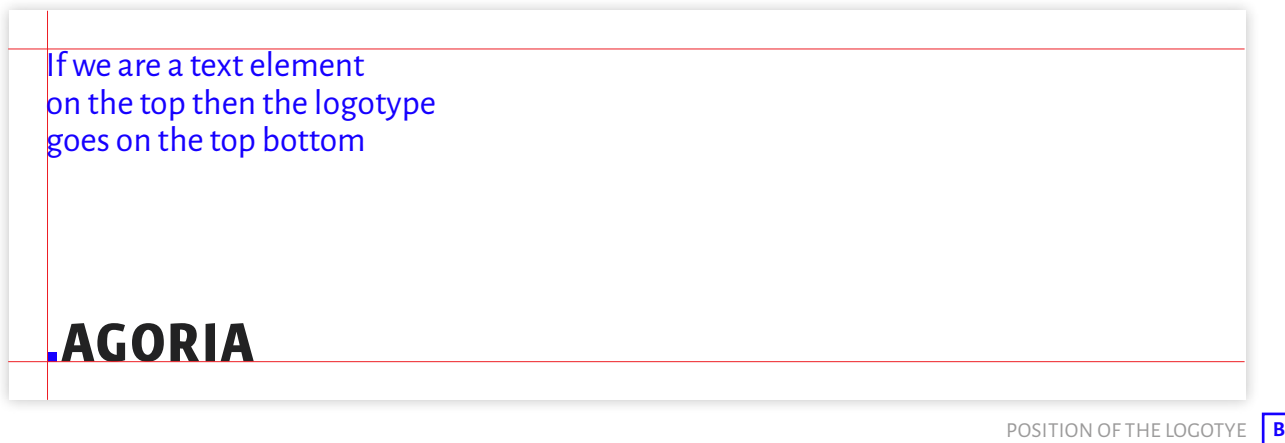

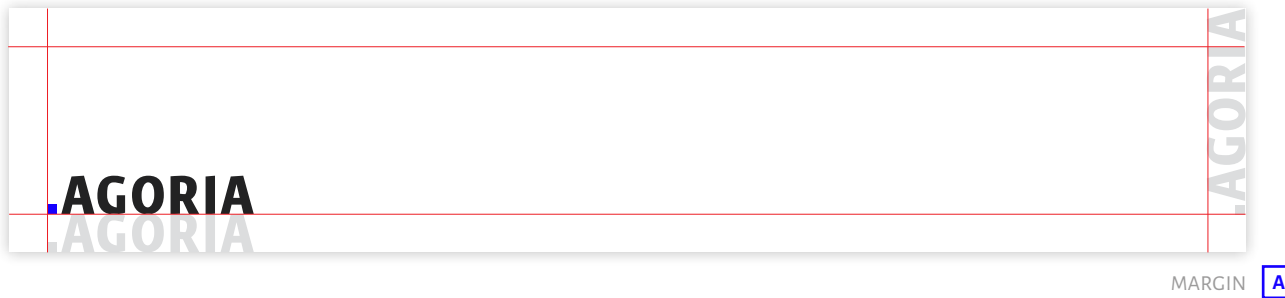

.AGORIA _____ 15 mm

.AGORIA _____ MINIMUM SIZE = 12.5mm **A**

2.3 Size and proportion

A minimum size **A** for the logo has also been defined to guarantee its correct legibility throughout its implementation on different supports. Always take the width of the logotype as the measurement reference.

> Always reduce the logo keeping its original proportions as in the example

2.3 Size and proportion

Follow these rules to position the logotype in the layout:

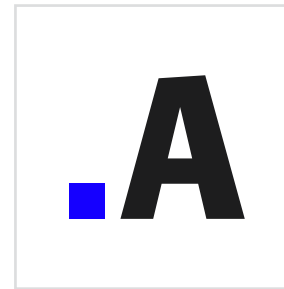

- A** define a margin taking the size of the logotype (twice the safety area)

The logotype can be placed in two ways:

- B** at the bottom aligned to the left side of the layout supporting a quote, the baseline, a title or any other text element that is placed above the logotype
- C** at the bottom aligned to the right side of the layout and placing the text element on the left side of the logotype

Important

Always respect the size and proportion rules previously defined in this guidelines for the construction of the baseline and quotes

MAIN VERSION **A**SECONDARY VERSION **B**RESTRICTED VERSION **C**

2.4 Logotype variations

Color alternatives offer different possibilities to apply the logotype in a consistent way.

For the logotype .AGORIA

A it is recommended to always use the full color version of the logotype (main version)

B for those cases where the logotype needs to be placed over a photo or a colored background it is recommended to use the full color version (main version) on a white background. This version is preferred over the 'restricted version' below.

C on exceptional cases use the negative version of the logotype (restricted version)

Important

Original artwork can be requested at branding@agoria.be

A

B

C

D

E

F

G

H

I

J

K

L

2.5 Missuses

The components of the logotype are placed in a fixed relationship and should never be altered or modified in any way.

The logo must be easily recognized. Always use the original artwork and avoid creating unofficial versions of the logo through one of these common mistakes:

- A Do not modify the color of the dot
- B Do not modify the color of the wordmark
- C Do not modify the color of the logotype
- D Do not change the typography of the wordmark
- E Do not put the wordmark in lowercase
- F Do not change the dot's shape
- G Do not remove the dot of the logo
- H Do not change the position of the elements of the logo
- I Do not modify the relationship between the elements of the logo
- J Do not stretch the logo or modify its proportions
- K Do not add any effects to the logo
- L Do not put the logo directly over photographic backgrounds

Important

Always use the original version of the logotype

Embracing technology
Embracing ambition

BASELINE A

■ AGORIA

SIGNATURE (logotype) B

2.6 Baseline

The baseline A helps to reinforce verbally what AGORIA is all about. Its purpose is to introduce the signature .AGORIA B with a strong vision, opinion and philosophy. This is the base of the identity system developed for the brand.

The baseline accompanying the logotype is 'Embracing technology Embracing ambition' describing AGORIA's main activity and complementing the whole concept that is represented in the logotype.

3.1 Digital color palette

Colors are a key element of our identity. They help to make the brand stronger and recognizable when used correctly and in a consistent way.

Always ensure that colors are correctly implemented by choosing the right color reference for the appropriate support or media.

A use the RGB values for digital applications; screen, digital media, web and online applications

B use the CMYK value for print applications; CMYK conversion and Pantone® values guarantee an exact color for offset printing. (see page 35)

Never use the automatic conversion of RGB to CMYK to PMS, please always refer to the chart of the color palette.

3.2 Secondary color duos

To add flexibility to our visual language there is a secondary color palette with color duos.

These secondary colors should be used sparingly and cannot be used to cover large areas of a design or for main typography and body text.

They are only intended to support our visual language and can be used within infographics, illustrations and small highlights in the design. They can also help to emphasize key information.

Each AGORIA color duo includes two authorized linear gradients.

Important

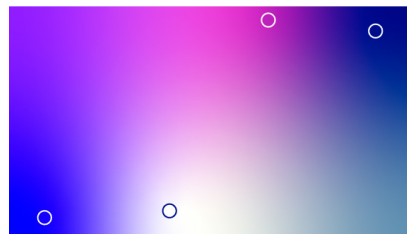

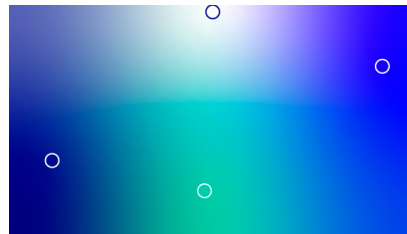

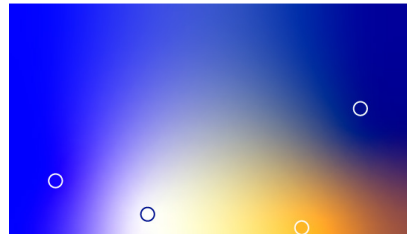

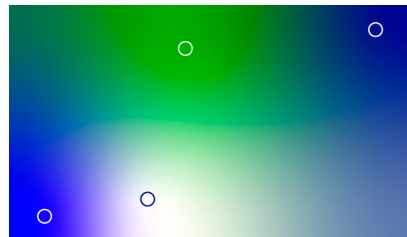

Original .ase files with color information can be found on The Blue Net

AGORIA

A 3-POINTS FREEFORM GRADIENT

B 4-POINTS FREEFORM GRADIENT

3.5 Freeform gradients

There is also the option to use freeform gradients.

You can choose between these two versions:

A 3-point freeform gradients:

Combine AGORIA Blue, AGORIA Dark Blue, and one of the dark secondary colors. Make sure the AGORIA blues are positioned on the far left and right edges.

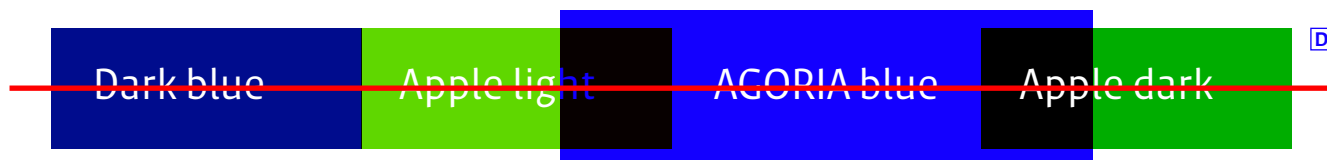

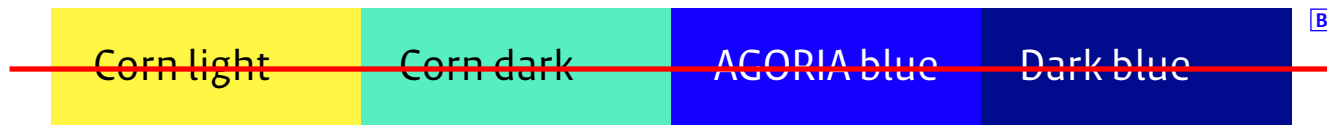

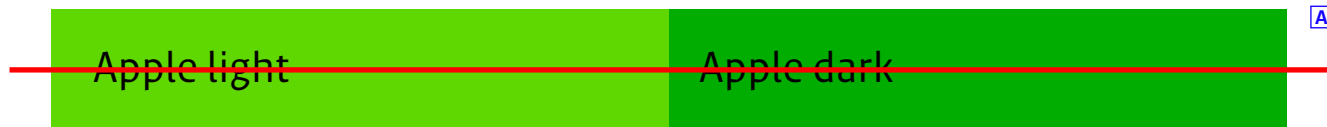

B 4-point freeform gradients:

You can also add white, but make sure it always on the inside of the gradient. Make sure the AGORIA blues are positioned on the far left and right edges.

Important

Original .ase files with color information can be found on The Blue Net

.AGORIA

3.6 Color misuses

A Brand Color Presence:

Ensure the bright blue brand color is consistently present in visuals.

B No Duo Mixing:

Avoid combining different AGORIA color duos within a single design for a clear and consistent visual presentation.

C Only use the approved gradients:

Utilize the approved color gradients to maintain a standardized visual identity.

D Avoid multiplying AGORIA blue:

Ensure AGORIA blue is not multiplied or mixed with secondary colors.

Important

Original .ase files with color information can be found on The Blue Net

THE BRAND

4. Images

- 4.1 Image use
- 4.2 Brand images
- 4.3 Midjourney image library
- 4.4 Star image

A

B

C

4.1 Image Use

AGORIA aims to establish a clear and consistent visual identity in its use of imagery.

As a guiding principle, we strive to **limit the use of stock photos and stereotypical visuals**. These types of images are only permitted in fast-turnaround content such as news updates or use cases.

To support this approach, AGORIA provides the following alternatives:

A Custom AGORIA illustrations

(e.g. 'brand images' page 28 - 33)

B A library of versatile Midjourney-generated images (see page 34 - 38)

For events and campaigns, a **custom visual** **C** may be created, provided it remains in line with AGORIA's visual identity and branding guidelines.

4.3 Midjourney image library

On 'The Blue Net' a new image library has been added to provide a set of multi-purpose images. Instead of using generic stock images, this library should be used.

The images have been made specifically to stand out as distinctively AGORIA, using the AGORIA blue in combination with one of the color duos.

The library has been structured according to the ambitions and domains. We start with around 100 pictures. More pictures will be added in the future as new themes and stories develop.

These images can be used for:

- The AGORIA agenda
- Presentations
- Publications
- ...

Star image - domains infographic

4.4 Star image

Another version of the star is featured in an infographic containing all ambitions and domains. When shown within the infographic, the colors of the star change to emphasize the four ambitions.

The Star image infographic is available in:

- Dutch
- French
- English

Important

This coloured version of the star image can only be used within this infographic. In all stand alone cases, the main variant should be used.

Important

The original files can be found on The Blue Net.

4.4 Star image

A Do not use the colored version without the infographic:

In all stand alone cases, the main variant should be used.

B Do not rotate the star:

Avoid rotating the star

C Only use the official color version

Important

The original file can be found on The Blue Net.

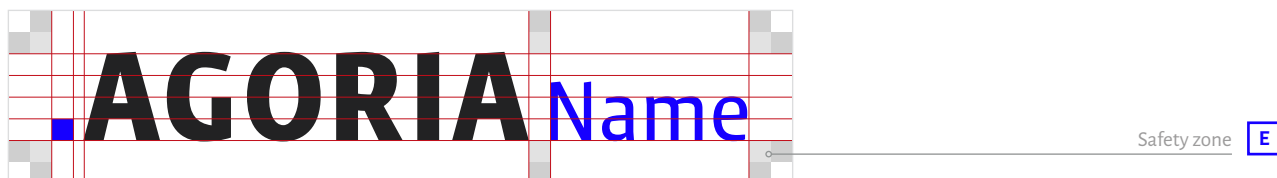

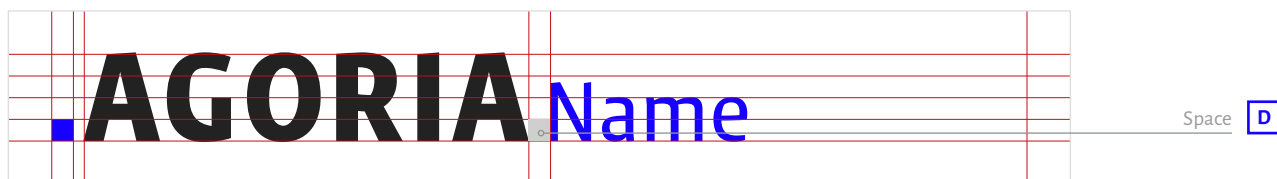

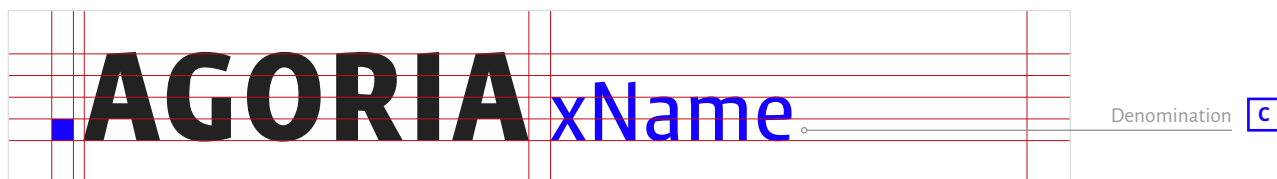

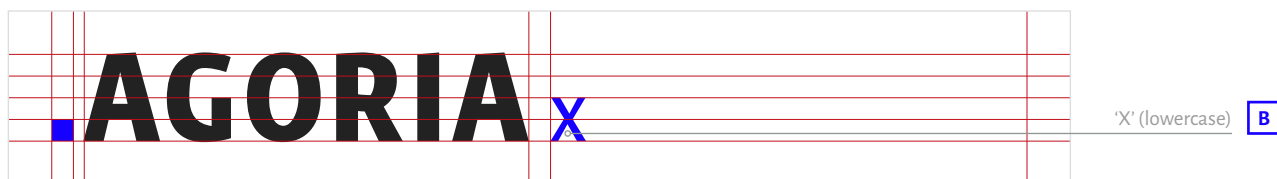

THE BRAND

5. Brand architecture

5.1 Construction rules

5.2 TECH BELGIUM logos

5.3 The AGORIA Academy logo

5.1 Construction rules

The elements (title) of the brand architecture must be always positioned to the right side of the logotype and must be written in the same blue color as the dot.

For construction, follow the instructions:

The size of the typography is defined by the construction rules of the logotype.

- A** take 2/4 of the logotype
- B** write the letter 'x' in **lower case** in the defined typography (see page 32) and in the blue colour
- C** the size of the 'x' defines the size of the typography to write the title
- D** the distance between the wordmark and the title is defined by the distance of the dot from the logotype.
- E** apply same rules previously defined to create a safety area that will guarantee a good visibility of the logotype.

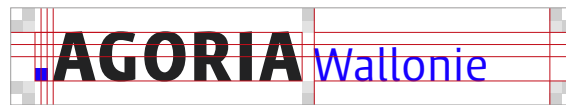

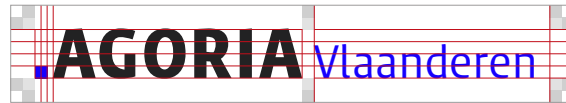

Important

Write always the denomination with a capital letter and the rest in lowercase.

AD HOC

F

5.1 Construction rules

Brand architecture helps to organize and give a structural meaning to the company. For the AGORIA brand it follows the same construction rules previously established and is implemented across all the different departments and sections of the company.

A for Lobby

highlighting the geographical position
(horizontal version)

B for Lobby

highlighting the geographical position
(vertical version)

C for TECH BELGIUM

We replace 'AGORIA' with 'TECH BELGIUM'.
However, we keep the 'dot' to maintain a visual link with AGORIA. Below it, we add the name of the market.

D for AGORIA Academy

E for Events,

Products & Services,

Platforms & Business groups

no specific logotype

F for Projects

AD HOC (specifics on page 36)

5.2 TECH BELGIUM logos

We replace 'AGORIA' with 'TECH BELGIUM'.
However, we keep the 'dot' to maintain a visual link with AGORIA. Below it, we add the name of the market.

Important

Seven official logos have been provided for TECH BELGIUM.

Important

The original files can be found on The Blue Net.

5.3 The AGORIA Academy logo

Next to the logos of TECH BELGIUM, there is also a logo for AGORIA Academy.

Important

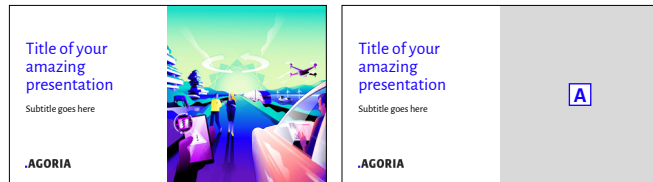

The original files can be found on The Blue Net.

TOOLS

6. Tools

6.1 PowerPoint template

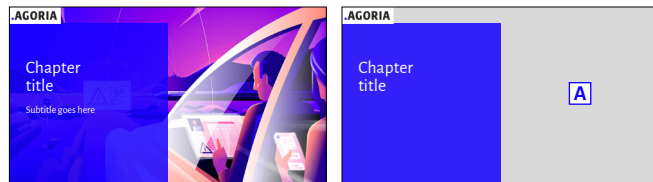

6.2 Outlook Signature

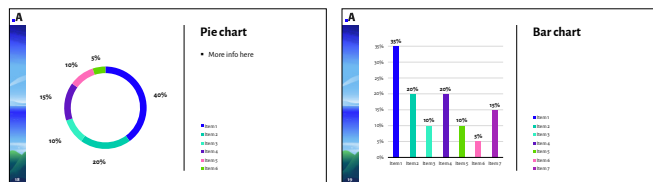

Intro slides

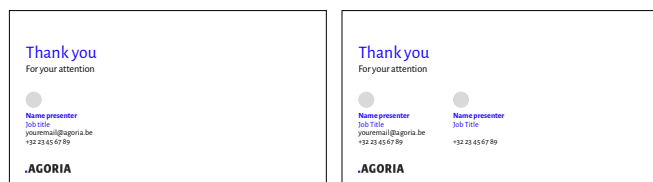

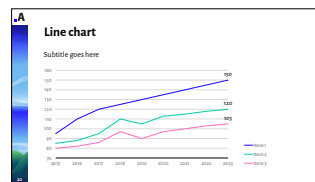

Content slides

Chapter dividers

Data slides

End slide

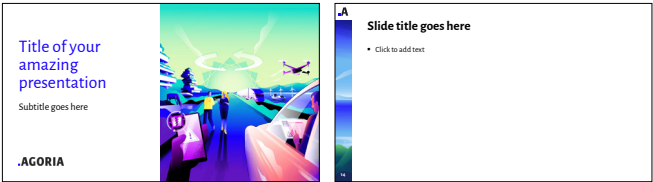

6.1 Powerpoint Template

Our standard PowerPoint template offers a number of cover, divider and text page options to suit a wide variety of presentations.

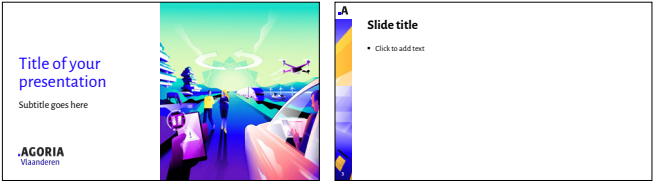

A The intro slides and chapter dividers include the 5 main images and an option to include your own image.

Tips

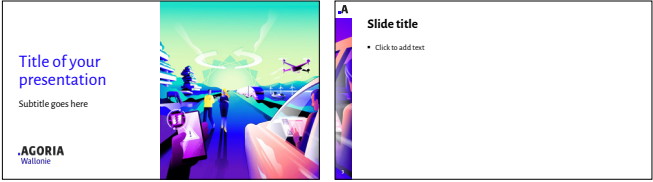

- > When adding new visual content, use the colors from the template
- > Use pictures from the Midjourney library, rather than generic stock images.
- > Text should be between 10 en 30 pt in size

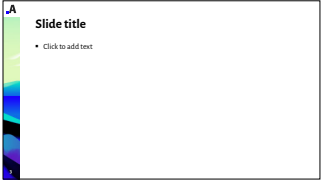

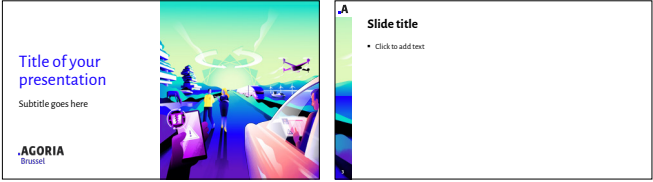

General version

6.2 Outlook Signature

To ensure a consistent AGORIA branding, it is important that all employees use a uniform Outlook signature.

To support this, you will find an overview of the recommended text styles and colors alongside.
